Managing bathing posture to support engagement and safety

Bathing can be important to people for a variety of different reasons, whether it be to benefit relaxation, sleep, play, or relationships. However, following a client centred and holistic bathing assessment, that identifies bathing as meaningful, the practicalities of making that a reality, particularly for someone with postural needs, can seem daunting and challenging. This session looks to consider the theory behind bathing posture, linked to functional engagement, safety and long-term health and well-being. Practical demonstration of products will be used to reinforce this learning and reflect on opportunities to meet this clinical and functional challenge. There will also be an opportunity to discuss individual challenges both within the session and on-stand.

The Sex Factor (Relationship & Sex Education training)

Chailey Heritage Foundation is one of the UK's leading centres for children and young people with complex neurodisabilities. There is a general misconception that Relationship & Sex Education (RSE) is not needed for these children and young people and we have found limited adapted RSE for them to learn, stay safe, understand their bodies, relationships and sexuality in full. We have developed a unique way of teaching this difficult subject and have created a user-friendly toolkit consisting of training sessions and resources for teachers and staff to deliver quality RSE to this group of youngsters.

Paula Marten, Assistant Head, Chailey Heritage Foundation

2:00 pm

Supporting Children & Young Adults With Property and Financial Deputyships

This seminar is aimed for those who care for or support a child who has a degenerative, physical or mental illness and may require additional support as they transition to adulthood. We will talk through how a family member or a professional may wish to become a Deputy to help manage Property and Financial Affairs, including capacity. Deputyships allow someone in a trusted position to be responsible for a vulnerable person's decisions; a process of applying to be a Deputy can be difficult to understand, confusing and stressful. Our experts will explain this process and how families and professionals can protect what matters most.

Irwin Mitchell - Stand number F14

Improving outcomes for positioning and repositioning in bed

It considers different types of users whether their needs are simple or complex, physical, or sensory and shows techniques for repositioning and positioning in bed.

Objectives:

- Understand the benefits of using in-bed systems and positioning cushions
- Know what type of cushion to use when i.e., lateral, and supine positioning
